Attachment 2 – Question # 13 – Sponsor's interest and role

Software.org, the BSA Foundation is an independent, and nonpartisan international 501(c)(3) research organization that helps policymakers and the broader public better understand the impact that software has on our lives, our economy, and our society. We believe that by working together to examine these issues we can better prepare for the future and help shape government policies and industry culture that will promote both technological advancement and widespread growth.

Software.org seeks to take Congressional staff on an educational artificial intelligence-focused tour of global software companies at their Boston area facilities. We have invited staff whose Senators serve on the Homeland Security, Intelligence, Armed Services, Judiciary, and Commerce Committees, or are in leadership offices in order to educate them about the software industry's approach to artificial intelligence (AI). On the trip, staff will learn about current research projects and the next steps in the development of AI technologies, ethical and public policy concerns facing lawmakers, the impact of federal partnerships with software developers in the AI space, and more. Software.org planned and organized all aspects of the trip, made lodging and travel arrangements, and corresponded with businesses involved to set up events and tours at each location. Software.org is the sole sponsor for this trip, including responsibility for covering cost of meals throughout the trip.
